

MET CS 634 – AGILE SOFTWARE DEVELOPMENT

05 | SPRINT PLANNING

THIS IS AN INDIVIDUAL ASSIGNMENT WORTH 10% OF THE OVERALL COURSE GRADE

OVERVIEW

In this assignment, you will perform a sprint planning exercise. Pulling from your prioritized backlog in Trello (assignment 3), create a sprint backlog in Trello. Decompose your backlog items into user stories, and create tasks and tests for each one.

ASSIGNMENT COMPONENTS

Sprint planning (Trello)

- Create a sprint goal
 - Break each backlog item in the Sprint into tasks and assign tasks to team members (*your facilitator will be reviewing your work in Trello, so please ensure that the information is clear and well documented*)
 - Add user tests to each story
-

GUIDELINES

Your first sprint should incorporate creating the overall layout of the site, and at least one high priority capability.

PRESENTING YOUR WORK

Submit the following:

- Link to Trello board with Sprint backlog details
